

ANDROID STUDIO JAVA İLE METHOD KULLANIM ÖRNEĞİ

UYGULAMA SORUSU : Method kullanarak, ekranda bulunan dört kutunun altındaki görselleri eşleştiren Android Studio java uygulaması.

NOT: ImageView yerleştirdikten sonra Attributes→Tag özelliğine cicek1, cicek2, zil,pacman yazılacaktır.

KODLAR

```
package com.example.methot_eslestirme;

import ...

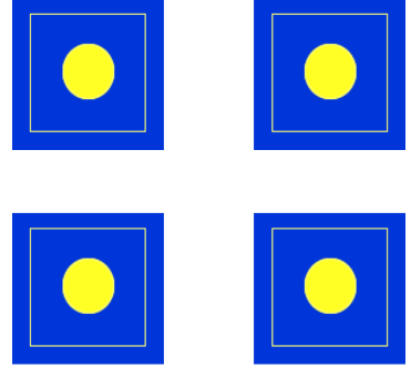

public class MainActivity extends AppCompatActivity {
    ImageView img1,img2,img3,img4,kapak;
    int sayac=0;
    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);
        img1=(ImageView) findViewById(R.id.imageView);
        img2=(ImageView) findViewById(R.id.imageView2);
        img3=(ImageView) findViewById(R.id.imageView3);
        img4=(ImageView) findViewById(R.id.imageView4);
    }

    public void tiklaImage(View v) {
        ImageView gorsel=img1;
        if (sayac<2) {
            sayac++;
            if (v.getId() == R.id.imageView) gorsel = img1;
            if (v.getId() == R.id.imageView2) gorsel = img2;
            if (v.getId() == R.id.imageView3) gorsel = img3;
            if (v.getId() == R.id.imageView4) gorsel = img4;
            switch (gorsel.getTag().toString()) {
                case "cicek1":
                    gorsel.setImageResource(R.drawable.cicek1);
                    break;
                case "cicek2":
                    gorsel.setImageResource(R.drawable.cicek2);
                    break;
                case "pacman":
                    gorsel.setImageResource(R.drawable.pacman);
                    break;
                case "zil":
                    gorsel.setImageResource(R.drawable.zil);
                    break;
            }
        } else {
            img1.setImageResource(R.drawable.kapak);
            img2.setImageResource(R.drawable.kapak);
            img3.setImageResource(R.drawable.kapak);
            img4.setImageResource(R.drawable.kapak);
            sayac=0;
        }
    }
}
```
